PROFESSIONAL SUMMARY

Full Stack Developer specializing in Next.js, TypeScript, and scalable web applications. Experienced in building production-ready automation platforms, AI-powered systems, and secure backend services. Strong background in frontend architecture, REST APIs, cloud deployment, performance optimization, and team collaboration (Agile/Scrum, cross-functional teamwork). Proven track record of shipping production-ready products like JobFormAutomator.com, focusing on high-performance engineering and rapid delivery.

PROFESSIONAL EXPERIENCE

- React & Next.js Developer Intern**

AIKing Solutions Pvt. Ltd. | Nov 2025 – Jan 2026

 - Engineered the AI Mock Interview module for **JobFormAutomator.com**, integrating Gemini API for dynamic questioning and GCP Smart TTS for human-like voice interaction
 - Developed the **JobFormAutomator.com** Chrome Extension to automate job applications and recruiter email extraction, streamlining workflows across LinkedIn, Indeed, and Monster
 - Architected scalable full-stack infrastructure using Next.js and Firebase, implementing secure authentication, data persistence, and an automated interview scoring system
 - Optimized the live production environment on Vercel by refactoring legacy code, resolving critical bugs, and maintaining strict Git workflows for the engineering team

PROJECT EXPERIENCE

- Commit Habit — GitHub Automation Platform**

Live: [commithabit.vercel.app](#) | GitHub: [Repo](#)

Tech: Next.js, PostgreSQL, Prisma, Supabase, GitHub API

 - Developed a secure GitHub automation platform using OAuth 2.0 and Webhooks to manage user contributions without personal access tokens
 - Engineered a smart scheduling system with customized cron jobs to automate commits while enforcing daily limits preventing API abuse
 - Built a comprehensive dashboard using Next.js App Router and Prisma to visualize commit activity and manage automation settings
- MockHick — AI Mock Interview Platform**

Live: [mockhick.is-a.software](#) | GitHub: [Repo](#)

Tech: Next.js, Firebase, Gemini API, Web Speech API

 - Built an AI-powered interview simulation app integrating Gemini API for dynamic, context-aware question generation and feedback
 - Implemented real-time voice interaction using the Web Speech API and GCP TTS to create an immersive interview experience
 - Architected a progressive web app (PWA) with Firebase Auth & Firestore for secure user sessions and interview history tracking
- Throughput — Real-time Network Monitor**

Live: [Download](#) | GitHub: [Repo](#)

Tech: .NET, WPF, C#, Windows API, Performance Counters

 - Developed a lightweight Windows desktop utility using .NET and WPF for real-time network traffic monitoring with an always-on-top overlay
 - Integrated low-level Windows Performance Counters to accurately track upload/download speeds with minimal system resource usage
 - Implemented an on-demand speed test system and packaged the application as a portable executable for easy distribution

TECHNICAL SKILLS

Languages: JavaScript (ES6+), TypeScript, C, Python, SQL
Frontend: HTML5, CSS3, Next.js (App Router), React.js, Tailwind CSS, ShadCN UI, PWA
Backend: Node.js, Express.js, Next.js API Routes, PostgreSQL, Prisma, Supabase, Firebase, MongoDB
AI & Cloud: Google Gemini API, OpenAI API, RAG, ML, Google Cloud Platform, Netlify, Render, Vercel
Tools: Git, GitHub Actions, CI/CD, OAuth 2.0, Webhooks, Postman, VS Code
Vibecoding & AI Workflows: Cursor, Antigravity, Claude, Prompt Engineering, Context-Aware Coding
